Experience

Vice President of Web Development – AutoMD – June 2006 to present

Strategic direction of technology for sales, marketing, branding, and services through web presence. Management of application developers, UI designers, information architects, database administrators, data-entry specialists and outsourced teams to build and progressively enhance website and service applications. Develop enterprise-level network architecture, create and maintain project scope requirements and deadlines and oversee deployment to various technology platforms and environments.

Solutions Developer / Chief Design Engineer – eREI – March 2007 to present

Architecting, designing, developing and integrating complex web and desktop applications for the commercial real estate industry. Build data exchanges and distribution systems, self-learning price and trend analysis applications, high performance reporting and accounting applications, web interfaces for client services and intranets for internal business processes.

Assistant Developer – University of California Davis – October 2005 to January 2007

Responsible for creating and maintaining content and features of the main website for the College of Agriculture and Environmental Sciences. Worked with in house team to develop enterprise-scale content management system with standards accessible frontend and integration with campus research and student web portals.

Creative Designer & Production Artist – SoliSys LLC – June 2006 to November 2006

Involved in production and maintenance of web sites and various print marketing materials. Provided support to clients on various technology networking services provided by company.

Creative Designer & Developer – Generation 2 Design – October 2004 to September 2005

Designed web and print media for advertising, branding and business exposure. Involved in technical support and quality assurance.
